

# MagFusion 1X

Magnetic Wireless Charger

## Key Selling Points

- **Qi2.2 Certified 25W Wireless Charger:** Qi2.2 certification ensures optimized wireless charging speed of up to 25W. When giving wireless charging for the latest iPhone series, this charger can be so powerful as to significantly reduce about 20 minutes of charging time compared to the last Qi standard. Now get yourself ready for the next-generation technology this AUKEY wireless charger delivers.
- **Strong Magnetic Force:** One of the very benefits that this charger provides is that the strong magnetic force ensures your device is perfectly aligned with the charging coil, and securely holds your device in place, even if it's bumped or moved slightly, making charging hassle-free.
- **Useful Stand:** It is not only an efficient wireless charger, but also can work as a useful stand when giving wireless charging. User experience is well elevated by the convenience that you are able to play your phone while having wireless charging.
- **Premium Metal Material:** This wireless charger is not only functional, but also aesthetically pleasing. The metal stand and high-quality paint finish add a touch of elegance to your workspace or bedside table, enhancing the overall look and feel of your environment.
