## Selling Points

- **8K@60Hz Video:** This cable ensures your 8K content runs at 60Hz, providing a smoother and more immersive viewing experience.
- **Ultra-Slim and Compact:** The cable is made to be compact and easy to carry around, especially when you travel often or need to connect your devices on the go, which brings much convenience with great portability.
- **Enhanced Durability:** The cable adopts nylon braided material, which adds extended times to bend and reinforce the durability with a longer lifespan to use. Meanwhile, the cable's sleek and robust aluminum case not only enhances its aesthetic appeal but also provides superior durability and heat dissipation.
- **Application Scenario:** For screen mirroring and display extension on laptops, smart phones, and tablets.
