USPs

- Multiroom speaker with an app powered by Linkplay.
- Compact, wireless speaker that sounds larger than it looks.
- 6 preset buttons

LONG DESCRIPTION

A small and easy to place multiroom stereo speaker. With stunning dynamics and deep bass in abundance, the C5 MkII W performs bigger than it looks. This is the new, improved version of C5 MkII. A wireless, multi-room speaker that offers an app based on Linkplay's latest technology, as well as the option of Google Cast, AirPlay 2, Spotify Connect and Tidal Connect, and an even greater sound than its predecessor.

The loudspeaker firmware together with the new Audio Pro app, both powered by Linkplay, offer EQ and Wi-Fi timing synchronization, and access to a wide range of streaming services. Both will be updated regularly, the app via your mobile device's app store, while firmware updates are managed automatically over-the-air, directly by the speaker. The multiroom function allows you to play the same music throughout your house. Group two C5 MkII W speakers in a left/right setup and the concert will be on stage in your home, literally. Play all together. Or not. You choose. Multiroom sound and multi person usage.

6 preset buttons give you easy access to your favourite playlists and radio channels. Simply press the button, no need to even open the app.

The C5 MkII was awarded multiple times for its sound quality and ease of use. This C5 MkII W delivers an even better sound and is thus expected to be a fantastic success. The product is the poster child for 'value for money'.

A turntable (external preamplifier might be needed), CD player or any other external audio source can be connected to the speaker via the RCA analog sound inputs and then played wirelessly to other speakers in your system.

Streaming services available: Amazon Music, Deezer, iHeart Radio, Napster, Qobuz, QQ Music, Spotify, Tidal, TuneIn, VTuner and many more via Google Cast and AirPlay 2.

THE W-GENERATION

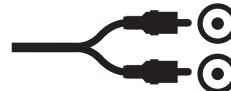

This product is part of the new W-generation of Audio Pro products, which means you get even better sound, a new user-friendly app and a refined and harmonized design. Our new app is based on Linkplay's latest technology, and offers an EQ, new streaming services and many more appealing features.
