COLOURS: BLACK, WHITE, WALNUT

Supreme home entertainment.

SHORT DESCRIPTION

This premium multiroom stereo speaker set is the right choice when you want the best of the best. When you need a speaker to perform extraordinarily well when watching TV as well as listening to your favourite music. This is the optimal speaker to perform both tasks in a unique way. The Audio Pro app, powered by Linkplay, gives you EQ and WiFi timing synchronization, a large number of streaming services and frequent firmware updates.

USPs

- Supreme sound quality for both music and movies.
- Multiroom speaker with an app powered by Linkplay.
- Excellent TV-compatibility with ARC

LONG DESCRIPTION

This multiroom active stereo speaker set is the right choice when you want the best of the best. When you need a speaker to perform extraordinarily well when watching TV as well as listening to your favourite music. This is the optimal speaker to perform both tasks in a unique way. You rarely find a speaker to handle both areas in such a supreme manner.

The sibling A38 W is a very high performing speaker, but the A48 W will knock your sound experience up yet another level. By using an unconventional BMR, we move the crossover down in frequency so more of the tweeter cover the vocal frequencies, increasing clarity and detail in the critical mid-range. It's the obvious choice for any HiFi enthusiast.

The A48 W multiroom speaker uses an app based on Linkplay's latest technology, as well as the option of AirPlay 2 and Google Cast. The loudspeaker firmware together with the new Audio Pro app, both powered by Linkplay, offer EQ and Wi-Fi timing synchronization, and access to a wide range of streaming services. Both will be updated regularly, the app via your mobile device's app store, while firmware updates are managed automatically over-the-air, directly by the speaker. It also supplies you with an even greater sound than its predecessor, A48.

With this speaker you can take total control of your home entertainment. When connecting to a TV we use ARC for easy volume control from the TV remote. Stream music from the major streaming providers via WiFi or Bluetooth. Connect your CD player through the optical input and your analogue source to an RCA input. Everything is controlled by Audio Pro's app or the enclosed remote control. Use the 5 presets for easy access to your favourite radio stations and playlists.

Another great feature is the re-streaming, meaning you are able to play your music (via Bluetooth or analog input) to the "master" speaker in your multiroom set up, which then can re-stream the music to other speakers which are grouped together via the Audio Pro multiroom app.

The wooden cabinet painted in stylish white or black, or if you prefer an exclusive walnut veneer, blends in naturally with your home. The fabric fronts are fixed by magnets and can be easily removed for a more modern look, if this is your preferred design.

Streaming services available: Amazon Music, Deezer, iHeart Radio, Napster, Qobuz, QQ Music, Spotify, Tidal, TuneIn, VTuner and many more via Google Cast and AirPlay 2.

THE W-GENERATION

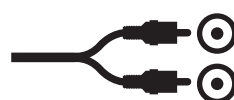

This product is part of the new W-generation of Audio Pro products, which means you get even better sound, a new user-friendly app and a refined and harmonized design. Our new app is based on Linkplay's latest technology, and offers an EQ, new streaming services and many more appealing features.

SPECIFICATIONS

Type: Powered stereo speaker system with bass reflex
