Colours: White/Black

PREMIUM HOME ENTERTAINMENT.

[FULL DESCRIPTION]

A48

This premium active stereo speaker set is the right choice when you want the best of the best. When you need a speaker to perform extraordinary well when watching TV as well as listening to your favourite music. This is the optimal speaker to perform both tasks in a unique way. You rarely find a speaker to handle both areas in such a supreme manner.

The sibling A38 is a very high performing speaker, but the A48 will knock your sound experience up yet another level. It's the obvious choice for any HiFi enthusiast. The A48 offers 3 different multiroom solutions; AirPlay 2, Google Cast as well as Audio Pro's own multiroom system. This speaker pair also provides Spotify Connect, Tidal Connect and Bluetooth.

With these speakers you can take total control of your home entertainment. Connect your TV with ARC for easy volume control from the TV remote. Stream music from the major streaming providers via WiFi or Bluetooth. Connect your CD player through the optical input and your analogue source to an RCA input. Everything controlled by AudioPro's app or the enclosed remote control. Use the 5 presets for easy access to your favourite radio stations and playlists. With the multiroom feature the A48 can be connected to your other Audio Pro, AirPlay 2 or Google Cast multiroom speakers in your network. No other brand can offer this versatility like these speakers.

In the app you can finetune your speakers bass/treble and add a virtual surround effect (Virtual Surround only available for the ARC input). This will give you a wider sound-stage when watching movies. Another great feature is the re-streaming, meaning you are able to play your music (via Bluetooth or analog input) to the "master" speaker in your multiroom set up, which then can restream the music to other speakers which are grouped together via the Audio Pro multiroom app. This means that you can connect your turntable to play music to your A48 speakers.

The wooden cabinet painted in soft satin white or black blends in naturally with your home. The fabric fronts are fixed by magnets and can be easily removed for a more modern look, if this is your preferred design.

TOP 3 FEATURES:

- Supreme sound quality for music and movies. Stream your music in high resolution quality.
- Compatible with AirPlay 2, Google Cast, Spotify Connect, Tidal Connect and Audio Pro Multiroom system.
- Excellent TV-compatibility and user friendliness with ARC.
