USPs

- Multiroom speaker with an app powered by Linkplay.
- Classic rock 'n' roll design
- 6 preset buttons

LONG DESCRIPTION

Sometimes nothing beats loud. Drumfire II W delivers a pure, bold sound with super crisp details. You will physically feel every little part of your music. But loud isn't everything, even listening at low levels, Drumfire II W will make your music come alive.

Drumfire II W is the new, improved version of Drumfire II. It offers multiroom listening via an app based on Linkplay's latest technology, as well as the option of Google Cast, AirPlay 2, Spotify Connect and Tidal Connect, and an even greater sound than its predecessor Drumfire II. The loudspeaker firmware together with the new Audio Pro app, both powered by Linkplay, offer EQ and Wi-Fi timing synchronization, and access to a wide range of streaming services. Both will be updated regularly, the app via your mobile device's app store, while firmware updates are managed automatically over-the-air, directly by the speaker.

The design is classic rock n' roll, but with a sophisticated twist. Wrapped in faux leather, with handstitched threads and details in solid aluminum, Drumfire II W will blend naturally into any home environment. Choose between soft white, stylish grey or classic black.

The multiroom function allows you to play the same music throughout your house. Group two of them in a left/right setup and the concert will be on stage in your home, literally. Play all together. Or not. You choose. Multiroom sound and multi person usage.

6 preset buttons give you easy access to your favourite playlists and radio stations. Simply store your lists and stations to these convenient buttons. No need to use the app, just push and play.

Streaming services available: Amazon Music, Deezer, iHeart Radio, Napster, Qobuz, QQ Music, Spotify, Tidal, TuneIn, VTuner and many more via Google Cast and AirPlay 2

THE W-GENERATION

This product is part of the new W-generation of Audio Pro products, which means you get even better sound, a new user-friendly app and a refined and harmonized design. Our new app is based on Linkplay's latest technology, and offers an EQ, new streaming services and many more appealing features.
