Long Form Descriptive Copy:
Lag-Free Wireless & Bluetooth®
The Turtle Beach® Stealth™ Ultra wireless smart game controller with charge dock delivers premium performance through the best possible components and customization options for gamers who demand the best. Lag-free wireless connection lets you reliably

connect to Xbox Series X|S & Xbox One consoles, Windows 10 & 11 PCs and built-in Bluetooth® connectivity gives you even more flexibility for direct connection to PC, Mobiles Devices & Smart TVs with Bluetooth®.

Advanced Customization

The innovative full-color Connected Command Display dashboard keeps you connected while you're gaming and offers extensive settings adjustments accessible right on the dashboard. A patented feature, only available on Stealth™ Ultra, you can receive social media notifications from your phone directly on the Command Display That means no more glancing away from the game to pick up your phone to check notifications, Stealth™ Ultra keeps them all front and center so you don't miss a moment of action. Also available in the Command Display dashboard, you can access on-the-fly adjustment for 10 on-board profiles for different game genres or character loadouts. Additionally, you can adjust key controller performance aspects, like button mapping, thumbstick response, dead zones, and vibration intensity. Make the Stealth™ Ultra your own, with 16.8 million different RGB colors, so you can set your preference for aesthetics, notifications, and low battery warnings. And for added convenience, these features and more are all adjustable in the Control Center 2 companion app for Xbox, Windows PC, Android & iOS devices.

Faster, More Reliable Controls

Designed for longevity and reliable performance, the Stealth™ Ultra features premium materials throughout. Tactile microswitches rated at a 5 million click life cycle are used in the D-Pad, ABXY cluster, mappable buttons, and bumper buttons for reliable, faster response with every click. The AntiDrift™ thumbsticks use non-contact hall effect sensors to enhance accuracy and improve durability, and two additional sets of thumbcaps are included for added customization & tactile preference. The trigger stops are adjustable for short hair triggers in action or FPS games, to full travel distance for fine adjustment of throttle and brake in racing games. Plus, four mappable quick-action buttons let you configure your exact control preferences depending on the types of games you play.

Long-Lasting Battery & Quick Recharging

The low-profile charge dock gives your controller a convenient place to rest and charge when it's not in use. With adjustable power modes, you have the freedom to tune product performance to extend battery life, such as entering stealth mode to turn off RGB lighting. High-speed charging over USB 3.0 gets you back to 100% charge in under 2 hours giving you up to 30-hours gameplay depending on power mode selected. The dock also has a built-in USB port so you can plug the wireless transmitter into the dock and only take up one USB port on your Xbox or PC. Designed for wireless use on Xbox consoles, Windows 10 & 11 PCs, and Smart TVs, the Stealth™ Ultra also comes with a 10ft / 3m USB cable so you have the option to play-and-charge.

Short Form Descriptive Copy (~100 words):

The Turtle Beach® Stealth™ Ultra high-performance wireless smart game controller with charge dock is built for gamers who demand the best. Lag-free wireless quickly connects to Xbox consoles, and Windows PCs, plus Bluetooth® for Android devices & supported Smart TVs. Tactile microswitches throughout provide fast, reliable response and last up to 5X longer than standard buttons, while AntiDrift™ thumbsticks eliminate drift for precise, customizable control and adjustable triggers suit your game on the fly. The Connected Command Display lets you customize the RGB lighting, audio, thumbsticks,

mappable buttons and more, plus patented technology receives social notifications from your phone. Best of all, adjustable power modes provide up to 30 hours of battery life on a single charge. (117)

Short Form Descriptive Copy (~50 words):
The Turtle Beach® Stealth™ Ultra high-performance wireless smart game controller with charge dock is for gamers who demand lag-free wireless and Bluetooth® convenience. Dominate with fast, long-lasting tactile microswitches, and AntiDrift™ thumbsticks for precise control. A Connected Command Display with full customization and social notifications, plus battery life up to 30 hours puts Stealth™ Ultra in a class of its own. (61)

Short Form Descriptive Copy (~25 words):
The Turtle Beach® Stealth™ Ultra wireless smart game controller with charge dock delivers premium performance through precision-crafted components and customization options for gamers who demand the best. (27)

Long Form Product Feature Bullets (~300 Character or less)

High-Performance, Lag-Free Wireless Technology
Our proprietary, lag-free 2.4 GHz USB transmitter gives you the freedom to wirelessly connect to Xbox consoles, and Windows 10 & 11 PCs by either plugging the transmitter directly into the device, or into the charge dock. Plus, with built-in Bluetooth® technology you can elevate your game experience on Android mobile devices and supported Smart TVs.

30-Hour Battery Life & Rapid Charge Dock
Our low-profile charge dock provides up to 30-hours of wireless usage, and fully recharges in just 2-hours using USB 3.0 high-speed charging. The dock also has a USB port so you can plug the wireless transmitter into the dock so you're only taking up one USB port on your Xbox or PC.

Connected Command Display
Unlike anything seen before in gaming, our dynamic full-color, Command Display dashboard keeps you connected with social media notifications, and extensive settings adjustments available right on the dashboard. Unleash the full potential of Stealth™ Ultra and save up to 10 profiles with customization of button mapping, dead zones & axis response modes, vibration intensity, audio enhancements, and RGB lighting.

Patented, On-Board Social Notifications
Receive social notifications from your phone for all your favorite social media platforms on the Command Display dashboard to keep you in the loop while gaming.

AntiDrift™ Thumbsticks
Contactless, hall effect thumbsticks use internal magnets instead of full contact analog-style sticks to provide high-resolution, smooth control without drift. You can even dial in stick performance to suit the exact game you're playing with linear input for consistent

steering in racing games, or precision input for pinpoint aim in action & FPS games. Plus, two sets of additional thumbcaps are included for tactile preference.

Precise, Microswitch Buttons
The Stealth™ Ultra was designed with high-end components throughout to boost performance and longevity. Tactile microswitches in the D-Pad, ABXY cluster, mappable buttons and bumper buttons give every button a faster, more reliable response, and are rated at 5 million clicks, or up to 5X as long as standard buttons.

Adjustable Trigger Stops
Modify the throw distance of the triggers on-the-fly to suit the games you play. Shorter hair trigger locks provide a faster return profile for FPS games or set to full travel for precise throttle and brake control when racing.

Four Mappable Quick-Action Buttons
Four mappable microswitch buttons on the back of the controller allow you to set up the Stealth™ Ultra to your exact preferences depending on the types of games you play. Within the 10 onboard profiles available, you can set specific button mappings and settings for multiple games and loadouts.

Pro-Aim™ Focus Mode
Selectable as one of preset functions for any of the four mappable buttons, Pro-Aim™ tunes thumbstick sensitivity for enhanced long-range accuracy. Whether it's a long-range snipe, or a daunting free kick, Pro-Aim™ is fully adjustable to dial-in the sensitivity just right.

Customization with Control Center 2 Companion App
Open the Control Center 2 app on your Xbox console, PC, iOS, or Android smartphone to adjust settings on the controller like social notification preferences, customization of button mapping, dead zones & axis response modes, vibration intensity, audio enhancements, and RGB lighting. Plus, the Control Center 2 app lets you quickly make product updates.

Advanced Audio Tuning
Enhance any 3.5mm connected headset with easy access audio features only available from Turtle Beach including four EQ presets and Superhuman Hearing®. Plus, you can set the game & chat volume mix to your exact preference, adjust mic monitoring and more, all directly from the Command Display dashboard.

Intelligent RGB Lighting
The intelligent RGB LED lighting system allows you to personalize the Stealth™ Ultra with 16.8 million distinct colors and effects. You can also set up different color combinations for notification alerts and low battery warnings to keep you in tune with product status.

Immersive Vibration Feedback

Dual rumble motors in the handles and triggers provide immersive vibration feedback and are fully adjustable via the Command Display dashboard. Tune the levels of vibration to suit the games you play, from maximum vibration for intense racing games, to minimum feedback for reduced interference when precise aim control is needed.

Premium Materials
Designed for longevity and comfort, the Stealth™ Ultra has soft touch finishes, long-lasting microswitches, and comfortable, ergonomic grips.

Charge-Through Case
Stow away your controller, charge dock, cables and included additional thumbcaps in the hardshell travel case, plus a built-in slot lets you charge your Stealth™ Ultra while in its case.

Short Form Product Feature Bullets:

High-Performance, Lag-Free Wireless Technology
Our proprietary, lag-free 2.4 GHz wireless connection and built-in Bluetooth® technology gives you the freedom to play without a wired connection.

30-Hour Battery Life & Rapid Charge Dock
Our low-profile charge dock provides up to 30-hours of wireless usage, and fully recharges in just 2-hours using USB 3.0 high-speed charging.

Connected Command Display
Our full-color Connected Command Display dashboard keeps you connected while you're gaming with social media notifications, and settings adjustments available right on the dashboard.
